

POWER BI

Microsoft Power BI is a self-service business intelligence platform, which includes both desktop and web-based applications for connecting, modeling, and visualizing data.

WHY POWER BI?

- Connect, transform and load millions of rows of data
- Build relational models to blend data from multiple sources
- Define complex calculations using Data Analysis Expressions (DAX)
- Bring data to life with interactive reports and dashboards
- Develop a versatile, in-demand skill set

EXCEL VS. POWER BI

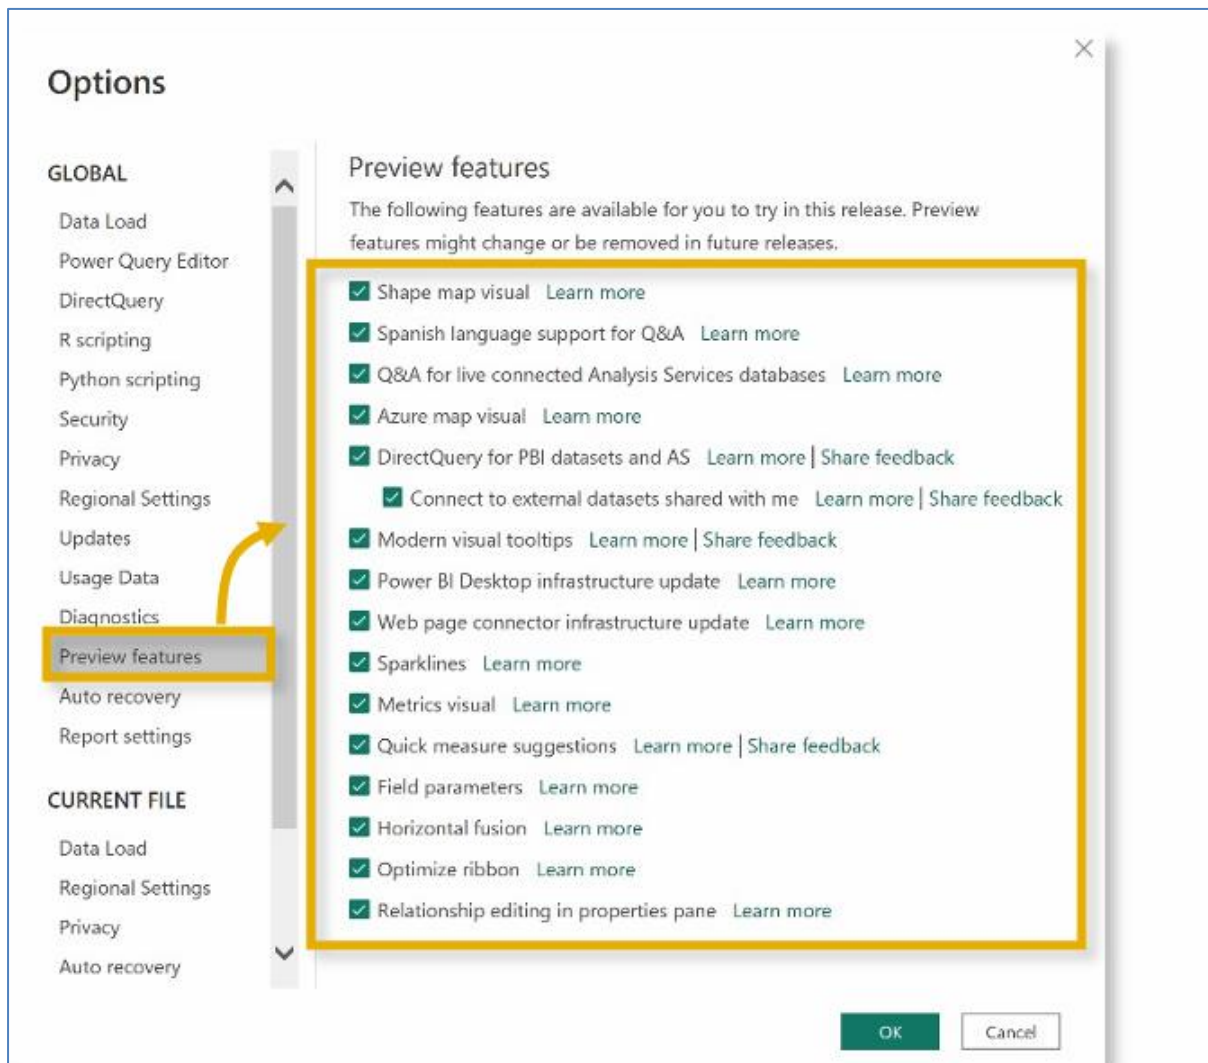

INSTALLING POWER BI DESKTOP

- 1) Download from Microsoft store apps.microsoft.com
- 2) Download manually from web powerbi.microsoft.com/downloads
- 3) Install as part of Microsoft 365 microsoft.com/en-us/microsoft-365

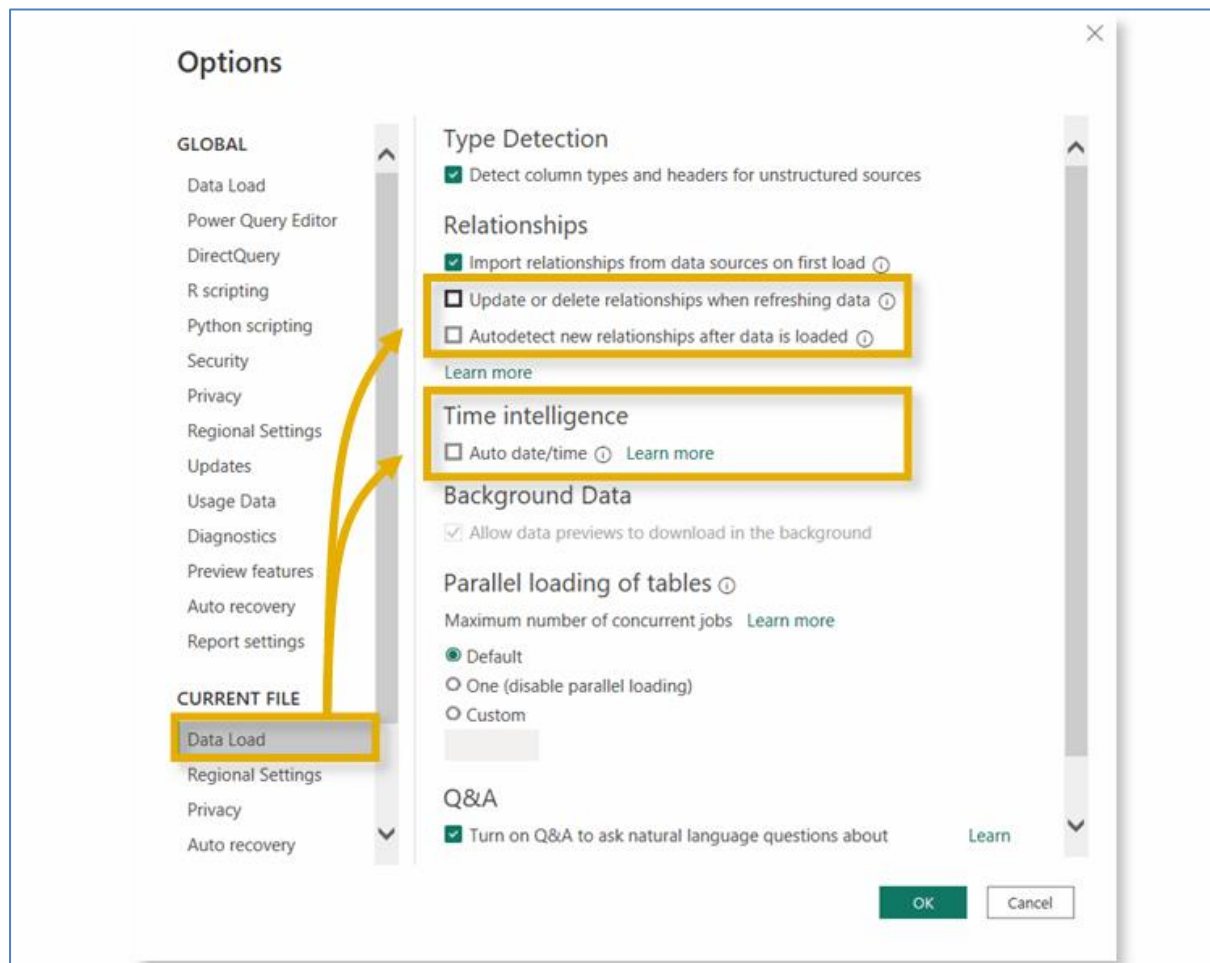

POWER BI SETTINGS

Global > Preview Features

Select **all available preview features** by default
(these change with each monthly release)

Current File > Data Load

Make sure the following options are **NOT** selected:

- ***Update or delete relationships when refreshing data***
- ***Autodetect new relationships after data is loaded***
- ***Time Intelligence > Auto date/time***
